**Subject:** Spot Safety project at Maloney Rd. & Alcoa Hwy.

Mr. Burr,

The Project has been awarded to contract and the project currently has an estimated completion date of 7/31/2014.

Next, a preconstruction meeting will be scheduled. During this meeting a start date for construction activities will be selected and schedule for construction activities would be discussed. This meeting includes the contractor, utilities owners, and TDOT staff. This meeting will likely take place towards the end of this month.

Due to the nature of this project, TDOT may provide additional public notices through our Community Relations Office to ensure the public is aware of the project as well. Thanks for your continued support of safety project on our highways.

Attached is a conceptual plan for the improvements being made at this location.

Nathan and Mike - Please advise us with the Lakemoor Hills neighborhood association when you expect the Spot Safety project at Maloney Rd. to be bid and construction start, so we can let folks know what to expect. I may be mistaken, but recall March of 2014 as the start date. thanks / Gene Burr
