

Strong Streams: Homeowner Rain Garden Workshop

FRIDAY, APRIL 20, 2018

8:30 AM -12:30 PM

COST: FREE

Why A Rain Garden?

Learn to locate, design, construct, and maintain a backyard rain garden. A rain garden is a planted depression that captures runoff and allows it to soak into the ground before it reaches a storm drain or creek. Rain gardens increase curb appeal and raise property values while lowering irrigation costs.

About the Workshop

- Classroom instruction from 8:30-10:30 at the Lake Hills Presbyterian Church, 3805 Maloney Rd, Knoxville
- Hands-on component from 10:30-12:30 at Circle Lake Park
- Free raffle prize of a rain barrel
- Taught by Dr. Andrea Ludwig, State Stormwater Management Specialist for UT Extension
- Coffee and snacks
